

What is NRG?

The **NRG Nano Standard of Care Wellness System** is both an assessment and therapeutic tool used by practitioners to:

- identify those substances causing negative stress on the body (stressors)
- correct your body's response so that future exposure to those substances no longer cause a stress reaction

How does it work?

The NRG System is based upon Bio-Electric (Frequency) Medicine principles that state that ALL substances, living or otherwise, possess a unique, measurable energetic frequency.

The NRG's FDA-Cleared BioFeedback System emits frequencies that are representative of these substances and records the body's stress reactions toward these frequencies. There are over 160,000 frequencies (stressors) stored in the NRG proprietary database.

As baseline parameters have been scientifically established for the response toward each frequency, any reading that falls outside of these parameters indicates that the representative substance may be creating undue stress and possibly contributing toward health issues and symptoms that are currently being experienced.

The NRG System provides the patient and practitioner with a report of findings indicating:

- the substances and groups identified
- the level of severity for each item
- whether it is contributing toward a chronic or acute condition

The NRG Corrective Light Wand

The NRG Therapy utilizes the NRG Corrective Light Wand to transmit a series of frequencies that are developed as a result of the biofeedback test, and unique to each individual. These frequencies are transmitted via LED light to various meridian points on the body.

NRG Therapy

By transferring these frequencies into the body, the NRG or Neurological Response Generating therapy recalibrates the body's response so that future exposure to the corresponding substances now allows the biofeedback measurements (and the body's reactions) to fall within the acceptable parameters. Your body no longer feels overburdened or stressed by the stressors.

The future of wellness.
BIO-ENERGETIC STRESS REDUCTION THERAPY

**Do you need
to de-stress?**

What is Stress?

Stress in humans results from interactions between persons and their environment that are perceived as straining or exceeding their adaptive capacities and threatening their well-being.

What is a Stressor?

A stressor is any biological, chemical, emotional or physical substance or factor that can cause temporary or permanent harm.

The **NRG Nano System** can benefit every patient whether it is used to address current health issues or used as a preventative means to maintain optimal health.

How can it help everyone?

Because stress affects **EVERYONE**.

The NRG 100-Point Wellness Inspection

This Inspection takes 10-12 minutes and provides a complete report of findings indicating the items (stressors), in order of severity and identified as acute or chronic problems, that are most likely contributing to the patient's health condition.

Internal and external stressors have been Scientifically Proven to contribute to many symptoms and illnesses including:

The future of wellness.

BIO-ENERGETIC STRESS REDUCTION THERAPY

NRG nano
Standard of Care
wellness system

The NRG Nano is safe and effective for adults and children of all ages.

The therapy is non-invasive, painless, contains no needles, shots, medication or supplements.

Because stress affects **EVERYONE**, **EVERYONE** can benefit from the NRG Nano System.

How many visits are needed?

- Improvement generally seen after 1st visit
- Typical patient has between 5-7 visits
- Patient should return every 3 months for preventative care by receiving a 100-Point Inspection.

How long do the sessions take?

- 100- Point Inspections take 10-12 minutes
- NRG Therapy Sessions take approximately 10 minutes each

What is the cost of treatment?

- Therapy Sessions vary from clinic to clinic (please contact your local NRG clinic for information)

Will I see improvement?

- Symptoms frequently diminish after first or second visit
- Results vary depending on individual's overall health and the immune system of each patient
- Short answer is "Yes. Yes. Yes."
